Washington, D. C.

1912-SPRING AND FALL-1912
CATALOGUE AND PRICE LIST

OF

FRUIT AND ORNAMENTAL TREES

SMALL FRUITS, SHRUBS, ROSES, BULBS, ETC,

(Copy)

ENTOMOLOGIST'S CERTIFICATE OF NURSERY INSPECTION.

This is to certify that on September 16, 1911, I examined personally the nursery stock and premises of the North Bend Nurseries, J. W. Stevenson, Prop., North Bend, Neb., and find no San Jose Scale nor indication that it has ever been present in the nursery or its vicinity, and the stock is apparently in a healthy condition and free from all other dangerous insect pests and fungous diseases.

This certificate is good for one year.

Lawrence Bruner.

WE PACK FREE. WE REPLACE AT HALF PRICE. WE GUARANTEE
GOOD STOCK IN GOOD CONDITION. WE PAY FREIGHT.

A WORD ABOUT AGENTS

It seems peculiar that buyers of nursery stock will give preference in buying to an agent they have never seen nor likely to see again. Another agent delivers the trees, and he will probably not appear again to the buyer. The customer pays him two to six times what the same stock could be bought for here. Last winter agents sold 6 to 12-inch catalpas for \$20.00 per 1,000 which we would have sold for \$3.00. They sold strawberry plants for \$3.00 per 100 which could be bought here for 50 cents. The nursery stock they delivered may have been packed several weeks before delivery. We ship as soon as packed. Very few agents know anything about the nursery business or the nursery they sell for. Probably a dealer or representative of one who buys where he can get stock the cheapest, regardless of variety.

Why not buy of a well-established mail order firm that offers stock at its value and will make good its promises of replacing and rectifying any mistakes that may occur?

What Some of Our Customers Say

Fullerton, Neb., April 18, 1910.
North Bend Nurseries, North Bend, Neb., Mr. J. W. Stevenson, Prop.

Dear Sir: I got all my trees in good order and have them all planted. They are doing nicely. I am well satisfied, and if I need more will surely send you my order.

FRITZ SCHLIESSER,
Fullerton, Neb.

Mr. J. W. Stevenson, North Bend, Neb.

Schuyler, Neb., March 14, 1910.

Dear Sir: Of the 100 Jack Pines I bought of you last spring I have about eighty growing. A few died, and ten I gave to Oscar Ernst, and all of his grew, so that of the 100 ordered 100 are nice and green, and am well pleased with them. There were a few extras.

FRED DeBOWER,
Schuyler, Neb.

North Bend Nurseries Co.

Atkinson, Neb., January 31, 1910.

Dear Sir: Trees I received from you last year did well, losing only one. Will send order for more soon.

PETER, TUSHLA,
Atkinson, Neb.

North Bend Nurseries.

Colome, S. D., February 22, 1910.

Please send me a fruit tree catalogue. The trees bought of you three years ago at Plainview, Neb., all grew but one.

Yours truly,
NELS. JOHNSON.

North Bend Nurseries.

Nebraska City, April 16, 1910.

Trees received in fine condition and am very much pleased with them. Thanks for the premium shrub. Yours truly,

ANTON PETERSON,
Nebraska City, Neb.

Beaver Crossing, Neb., April 4, 1911.

Dear Sir: Everything came O. K. and perfectly satisfactory. Kindly place me on list for next year's catalogue, as I am likely to duplicate order of this year.

Yours truly,
C. W. DOTY.

Thedford, Neb., September 15, 1911.

Mr. J. W. Stevenson, North Bend, Neb.

Dear Sir: I received your gentlemanly letter and am delighted to know I have dealt with such a gentleman as you. Out of the 1,000 trees I got of you I think about 600 are still living and doing fine. The trees were allowed to heat while in transit, but done well considering all things. As long as you continue your square deal with me you can have my patronage; also a warm word in your favor to my friends.

Respectfully,
S. E. MILROY.

Tecumseh, Neb., November 2nd, 1911.

Gentlemen: I got a fair stand of strawberries. Everything I planted was in good condition when received. Could not expect you to be responsible for the season. May not be in the market for any nursery stock next spring, but if I should be will place order with you.

Yours truly,
C. E. STALEY.

To Our Esteemed Patrons and Friends

We take pleasure in presenting you our catalogue for 1912, and thank you for your patronage and kind words. Our circle of friends and customers is enlarging year by year, and we will do all we can to merit their patronage and good will by giving stock of good varieties in good condition.

Our thirty-three years' experience in handling and growing nursery stock in the state convinces us more and more that purchasers will save money and labor by buying from reliable nurserymen near home. We know the varieties that succeed the best, and it is to our interest to give you varieties that succeed, for your success will help us to sell to others. Agents of Eastern nurseries are selling many varieties that are a failure in the West. Nor can you select from their catalogue such varieties as you ought to have. Many agents boom high-priced, untried novelties in fruit as especially important, when we know that not more than one out of ten of them generally prove valuable.

Agents—We have no traveling agents, and in presenting this catalogue we give the customers the benefit of agents' commission and expenses. You will find by comparing our prices with those of some agents who may canvass you that we are from 50 to 500 per cent cheaper. An agent's commission and expenses will cost at least one-half the amount of his orders, and the customer must pay the extra expense of the agent. Anyone wishing to get up a club can have 10 per cent commission and freight paid. Our prices are too low to afford a larger commission.

Location—North Bend is in Dodge County, fifty miles west of Omaha, on the Union Pacific railroad, and two miles from Morse Bluff, on the C. & N. W. railroad. We ship to points on the latter road from Morse Bluff, and thus save the extra cost of shipping over two lines of road. Our soil is a clay loam four feet deep, and is unsurpassed in quality in the world for growing good trees, plants or crops of any kind. Our plants and trees root deeply in our porous soil, and destructive drouths seldom injure them.

Irrigation—We irrigate our small fruit when needing it, and can therefore give superior plants in dry seasons. We have a large demand for strawberry and raspberry plants from nurserymen and dealers, because we can supply them in all seasons with first-class plants. We have extended our irrigation facilities till we can water everything we grow. Though we are not in a drouthy belt we greatly appreciate the advantages of irrigation in growing fruits and nursery stock, for if we guard against drouths we can grow very successfully a great variety of fruits in Nebraska.

Terms—Cash with order. Remit by bank draft, postoffice or express money order, or registered letter. Orders amounting to \$10 or over will be sent C. O. D. if desired, if one-third of the amount is sent with the order.

Orders should be sent in as early as possible, written on separate sheets from the letter, giving full and explicit directions as to route, whether by freight or express, and give the nearest railroad or express office as well as your postoffice. If you do not hear from us in a reasonable length of time write again, as there is a possibility of an order being lost. Claims for errors, if any, should be made within five days after receiving the goods. No order should be sent for less than \$1. Always keep a copy of your order for reference and checking off stock when received. Our prices include packing and delivery at the depot, when our responsibility ceases. In case of delay we do our utmost to facilitate delivery.

Packing will be done in the most careful manner, so the stock will be sure to reach the customer in good order, which we guarantee it to do. Packing season usually commences March 20 and October 1.

We manufacture and sell the Thomas Tree Baler, Box Clamp and Fodder Binders. We have customers in nearly every state and in Canada. Will send descriptive circulars and testimonials to any who may wish them.

Estimates will be cheerfully furnished on large orders.

Replacing—We will replace all fruit trees and plants that die from any cause at half our retail price. If we are to blame for the condition of the stock we will replace free.

Few firms are as liberal as we are about replacing.

Guarantee—We aim to have our stock true to name and carefully labeled; yet, while we exercise the greatest care to do this, we will not be held responsible for any sum greater than the cost of the stock that proves untrue.

Varieties—As far as possible leave the selection of varieties to us. We will use our experience with fruit in Nebraska for the past thirty years for your benefit. Many select too many varieties, and often not the best sorts. When varieties become exhausted we reserve the right to substitute others of the same class and value or of larger size, except when orders are marked "No Substitution."

ORDER EARLY AND GET FIRST ATTENTION.

A Descriptive Catalogue will be furnished for ten cents. If an order is sent we will credit the amount on the order.

Horticultural Reports of the State Horticultural Society will be sent by mail if 10 cents is sent for postage.

Directions for Planting will be sent to each one ordering.

Prices for 6 at a dozen rate, 5 at 10 rate, 50 at 100 rate, 500 at 1,000 rate, though several varieties in a class make up the number.

References—First National Bank, National Bank of North Bend, A. F. Doubrava or Frank Dattel, prominent merchants of North Bend.

Freight or Express charges can be paid at destination, as our guarantee is accepted by railroad and express companies. Small bales go as cheap by express as by freight, and when such is the case we send by express.

We will pay the freight on an order, or several orders, amounting to \$5 or more, excepting on lots bought at wholesale prices, or at rates per 1,000, and will limit our liability for freight or express to 10 per cent of the order. Instead of having freight prepaid customers may select additional stock to amount of 10 per cent of the cash sent in. This offer will be an advantage to customers near us, and all buyers of any amount may take the benefit of the offer. This 10 per cent premium usually exceeds the amount of the freight.

We have found the prepaying of freight a great inconvenience.

Heeling-in and Planting—When trees are received heel in immediately so that mellow earth comes in contact with all the roots, and water the roots if the earth is dry. Do not let the bale or box be exposed to sun or wind an hour if you can avoid it, and in planting do not let the roots get dry for a moment. In planting make a hole sufficiently large so roots will not be bent or twisted. It is a good plan to have roots grouted or dipped in mud before planting. Plant one or two inches deeper than the trees stood in the nursery. Pack the soil firmly about the roots, and after roots are covered add a bucket of water. When soaked away fill up the hole nearly even with the surface, but have the soil on top loose. Where water is plentiful fill up the hole partly with fine, loose surface soil and settle it about the roots with water instead of tamping it in. Cultivate with hoe or cultivator every ten days or oftener till middle of August. Nothing should be allowed to grow within two or three feet of the tree. Shorten in branches to one-third of last season's growth, and leave only four or five limbs on an apple tree.

In planting valuable trees a tube of wood or cement may be set in the hole six inches from the tree and to same depth the tree is planted. The roots of the tree can be more effectually watered through it with half the amount of water applied at the surface. The water usually applied at the surface seldom reaches as far as the roots.

Dynamite may be used very successfully for making holes for planting trees, especially where there is hardpan under the soil. The dynamite will loosen the hard soil to a depth of six to ten feet, and trees planted there will grow rapidly and not suffer with drouth or surface water.

If you receive two or more catalogues please pass the extras to neighbors or to friends who may need them.

Clubs—To those who send in other orders besides their own we will allow a commission of 10 per cent, including order of the person getting up the club.

Names Wanted—Send us the names and P. O. address of all persons who might wish to grow fruit, and we will send you by mail or add to your order Strawberry, Raspberry, Blackberry, Dewberry or Rose bushes and Shrubs, according to the value of your list. Be careful not to put in the names of those who cannot plant anything. Our price list is our agent. He will treat you well, so introduce him to your acquaintances.

We will be especially liberal with those who give us a complete list of land owners getting mail at any office and check those most likely to plant trees.

PREMIUMS.

In addition to our 10 per cent premium to pay freight we offer an additional premium of 5 per cent on orders sent in with the cash before February 20, and 3 per cent before March 1, and such orders shall have precedence in packing.

If all orders could be sent before March 15th it would be better for the customer as well as the nurseryman.

We can most heartily recommend the firms advertising in this catalogue. We are confident that anyone dealing with them will be well pleased.

The past season has been the dryest we ever experienced in Nebraska. Fruit trees are well rooted and caliper nearly as much as usual, but are not as tall as in wetter seasons.

APPLES.

We have our usual supply of apple and crab trees, and though they have greatly advanced in price the past year we still offer them at nearly former prices, which is low for good trees.

	Each	10	100
5 to 7 feet, select 2 and 3-year	\$0.30	\$2.70	\$25.00
4 to 5 feet, select 2-year trees25	2.20	20.00
3 to 4 feet, select 2 year good trees20	1.60	15.00
3 to 4 feet, select 1 year18	1.50	14.00
2 to 3 feet, 1-year good trees15	1.20	10.00

We will give such varieties as will succeed best in this latitude and north of here. We have other varieties in smaller supply, but recommend following:

Summer Apples—Early Harvest, large, yellow, good quality, season July. Yellow Transparent, large, white, excellent quality, season July, early bearer.

Red June, medium size, good bearer, ripens after Early Harvest. Tetofsky, a handsome Russian apple, very hardy and productive. Red Astrachan, large, crimson, moderately productive and hardy; follows Early Harvest. Duchess of Oldenburg, large, striped, extremely hardy, good bearer, ripe August 1. Early Pennock, Benoni, Chenango Strawberry and Cooper's Early White are all valuable sorts of excellent quality, ripe August 1 to 15. Sweet June and Sweet Bough, sweet, early apples, good quality, ripe in July.

Autumn Apples—Wealthy, large, red or striped, excellent quality, extremely hardy, season August and September. Haas, similar to Wealthy,

hardy, good bearer, season August and September. Maiden Blush, large yellow, hardy, productive. Utter's Red, large, yellow, pale stripe, hardy, good quality, good bearer; follows Wealthy. Fameuse or Snow, nearly red, flesh white, medium size, hardy, season October. Ramsdell Sweet and Price's Sweet are valuable fall sweet sorts. Rambo, delicious quality, but tree rather tender, season October and November. Wolf River, very large, hardy, productive, season September and October. Fall Wine, Dyer Cole's Quince, Longfield. Fall Winesap and Day are all grand, good fall sorts, season September to November.

Winter Apples—Jonathan and Grimes' Golden Pippin, early winter sorts of high quality, good early bearers, moderately hardy. Iowa Blush, medium, delicious quality, tree hardy, early, good bearer. Northwestern Greening, large, yellow, good keeper, good bearer, hardy. Ben Davis and Gano are much alike, great bearers, thrifty, hardy trees, most profitable sorts to plant extensively. Winesap, well known sort, high quality, good bearer, long keeper. Mammoth Black Twig, an improved Winesap, tree similar, fruit larger. Missouri Pippin, good size, red or striped, good size, red or striped, great and early bearer, hardy. Salome, medium size, very hardy, good quality, late keeper. Stayman's Winesap, one of the finest in cultivation. Talman Sweet and Isham Sweet are excellent winter sweet apples. Rawles' Janet, medium size, long keeper, blooms very late, great bearer alternate years. Sheriff and York Imperial are both valuable sorts. Walbridge, a great grower, large size, does best north; late bloomer.

Special Sorts—Bismarck, new, bears when two or three years old, large apple, good quality, early winter sort. Reagan's Red or Black Ben Davis, better quality than the Ben Davis and as good bearer. Okabena, very hardy north, large and good quality, November to January. Malinda, one of the hardest sorts, long keeper, size medium large. McIntosh Red, very hardy, resembles the Fameuse, but larger, longer keeper. Liveland Raspberry, very early, hardy, profuse bearer. Winter Banana, superior quality; very early bearer, long keeper, large. Patten's Greening, large and hardy winter sort. Each of above sorts, 5 to 6 feet, 35c; 4 to 5 feet, 30c; 3 to 4 feet, 25c.

Delicious, a winter sort of extra quality, red, large size, very highly praised and advertised; 4 to 5 feet tree, 35c; 3 to 4 feet, 30c; 2 to 3 feet, 20c each.

We can furnish any other old or new sort not in above list.

CRAB APPLES.

Same price as apple trees of same size. Whitney No. 20, the earliest and largest, a good eating apple when ripe. Sylvan Sweet, Martha, Florence, Red and Yellow Siberian, medium season, good size and quality. Hyslop, Alaska and Gideon No. 4 are the latest, all of good size and excellent quality.

PEARS.

	Standard.	Each	10	100
5 to 7 feet, select		\$0.35	\$3.00	\$28.00
4 to 5 feet, good trees30	2.50	24.00

Bartlett and Clapp's Favorite, best early sorts. Duchess, Flemish Beauty, Sheldon, Seckel, Garber and Keiffer are best fall sorts.

Dwarf.

Varieties same as Standard.	Each	10
4 to 5 feet	\$0.35	\$ 3.00
3 to 4 feet30	2.50
2 to 3 feet25	2.00

Plant at first only three or four varieties. Do not stimulate growth too much after the first year. Coal ashes around the trees is said to be valuable to prevent blight. Keiffer and Garber blight the least.

CHERRIES.

Budded on Mahaleb or Mazzard roots and will not sprout unless planted too deep. If planted too deep the tree will start roots near the surface and sprouts will start from them. The bud should be covered about two inches below the surface. Sweet or Heart cherries do not succeed well, but will furnish them if wanted at the same price as the others. Would recommend Early

NORTH BEND NURSERIES, NORTH BEND, NEB.

Richmond, Montmorency, Dyehouse, Wragg English Morello, Ostheim and Baldwin. They may be planted 16x16 feet. Rocky Mountain cherries are worthless, so we do not list them. The Compass cherry is of very poor quality, though very hardy; 3 to 4 feet trees, 30c; 4 to 5 feet, 40c each.

	Each	10	100
5 to 6 feet, choice trees, first-class	\$0.40	\$3.50	\$30.00
4 to 5 feet, good trees35	3.00	25.00
3 to 4 feet, good roots25	2.00	15.00
2 to 3 feet, trees15	1.25	10.00

They ripen in the following order: Dyehouse, Early Richmond, Montmorency, Ostheim, Baldwin, English Morello and Wragg. Whole season June 15 to August 10. Sweet cherries same price for same size. Windsor is probably the hardest sweet cherry. The Bing, a new sort, is very popular.

The grade of cherry trees is governed more by the caliper of the stem than by the height.

PLUMS.

In northern part of the state plant mostly of American varieties. They ripen up about the following order, and are the leading sorts, though there are multitudes of other sorts, Milton and Wild Goose in July; Pottawattomie, Forest Garden, Wolf, Weaver, Hawkeye and Wyant in August; Stoddard, DeSoto, Miner and Surprise in September.

Japanese Plums—Abundance (early), Burbank, Red June, Wickson, Satsuma. These sorts are much larger, but not so good quality as European sorts.

European Plums—Lumbard, Tatge, Moore's Arctic, Green Gage, Shipper's Pride. German Prune, Bradshaw, Yellow Egg.

Plant ten or twelve feet apart in thicket form to insure fertilization. Plant several varieties together. Head back in the spring, thus keeping them close headed and stocky and preventing them from breaking down when loaded with fruit. By proper assortment you may have plums from July 15 to October 15.

	Each	10	100
5 to 6 feet, select	\$0.45	\$4.00	\$35.00
4 to 5 feet, good40	3.50	30.00
3 to 4 feet, select 1 and 2 year30	2.50	20.00
2 to 3 feet20	1.50	12.50

PEACHES.

Peaches are being extensively planted in Nebraska and have yielded good crops. The hardest sorts of budded peaches are much harder than seedlings. It is a very common mistake to suppose that seedlings of peach or apple are harder than selected budded or grafted sorts. The quality of the fruit of such seedlings is usually very poor. We recommend as best and hardest the following sorts, which ripen nearly in the order given here: Sneed, Alexander, Amsden, Hales, Early, Triumph, season July; Champion, Crawford's Early, Bokara No. 3 (claimed to be the hardest peach known), season August. September sorts are Hill's Chilli, Elberta, Crosby, Wright, Baily, Beer's Smock. Clingstone sorts are old Mixon Cling, Blood Cling, season September. The earliest sorts are clings. The Wright and Bailey are very hardy, but not as good quality as the others, and not ripe until last of September. Hardest sorts same price as others.

	Each	10	100
5 to 6 feet, budded sorts	\$0.25	\$2.00	\$18.00
4 to 5 feet, budded sorts20	1.80	16.00
3 to 4 feet, budded sorts15	1.20	12.00
3 to 4 feet, seedlings10	.80	6.00

APRICOTS.

Apricots are usually harder than peach trees, particularly the budded Russian sorts. Russian sorts: Alexander, Alexis, Gibb, J. L. Budd, season July 1 to August 1. Other sorts are Harris, Early Golden and Superb.

	Each	10	100
5 to 6 feet, 2 year	\$0.25	\$2.20	\$20.00
4 to 5 feet, 2 year20	1.80	18.00

NORTH BEND NURSERIES, NORTH BEND, NEB.

NECTARINES.

Same price as apricots.

QUINCES.

Quinces have not succeeded here or elsewhere in Nebraska so far as we know, but should be experimented with in different localities and with a variety of treatment.

	Each	10
3 to 4 feet	\$0.30	\$ 2.50
4 to 5 feet35	3.00

CURRANTS.

Currants and Gooseberries in their wild state grow in moist places, and we can best supply this natural demand by planting in rich soil and by mulching and manuring well. Ashes may also be used freely about them. Shelter them as much as possible from the south wind. Plant 4 to 5 feet apart. Standard sorts: Red and White Dutch, Cherry, White Grape, Victoria, Versailles, Black Naples, etc.

	Each	10	100
No. 1, strong 2-year plants	\$0.10	\$0.90	\$ 7.00

GOOSEBERRIES.

Plant in rich soil, manure once a year, prune thoroughly every year.

	Each	10	100
Houghton, red, reliable old sort, berry small, surest bearer, 2-year	\$0.12	\$1.00	\$ 9.00
Downing, green, large berry, one of the best, 2 year....	.15	1.20	10.00
Pearl, new, very large, green, very profitable, 2-year....	.15	1.20	10.00
Red Jacket, red, very large, healthy grower, pro- ductive, 2-year20	1.50	12.50
Industry, English, red sort, very large, not reliable....	.20	1.50	12.50
Currants and Gooseberries sent by mail, 15c extra per 10, for 1-year plants.			

RASPBERRIES.

Easily grown. Plant 2 feet by 6. Pinch back black caps first year when 1 to 1½ feet high. Plant 200 or more for family use. We grow large quantities.

Black Cap Varieties are as follows:	10	100	1000
Tyler and Palmer, earliest, hardy, productive.....	\$0.25	\$1.50	\$10.00
Conrath and Kansas, medium season, very hardy, large, productive25	1.50	12.00
Nemaha and Gregg, latest in season, very productive..	.30	2.00	12.00
Cumberland, new sort, largest raspberry grown, canes strong and hardy, medium30	2.00	15.00
Red Cap sorts that root from tip:			
Redfield and Wallace, strong growers, hardy, pro- ductive30	2.00
Haymaker and Cardinal Red, strong growers, very large berry, hardy30	2.50
Red Cap sorts that sucker:			
Turner, well known, productive25	1.50	10.00
Miller, hardy here, good bearer25	1.50	10.00
Louden, best red sort, very large, hardy, very pro- ductive30	2.00	12.00
Eaton—New sort, very large and productive. Received Medal at Pan- American Exposition and Silver Medal at St. Louis Exposition.			
King—New Red sort, very large, productive, claimed to be the best of all red sorts. Price for above 2 sorts per 10, 40c; per 100, \$2.50.			
Lots of 10 can be mailed free of postage.			

BLACKBERRIES AND DEWBERRIES.

Plant 3 by 7 feet. Pinch or cut new growth of Blackberries back when 3 feet high. Treat suckers of Blackberries and Red Raspberries between the rows as weeds and cut them off once or twice in the spring. We can furnish other sorts, but do not recommend them.

	10	100	1000
Snyder, hardiest of all Blackberries, excellent quality..	\$0.30	\$2.50	\$15.00
Stone's Hardy, very hardy, good bearer, good quality30	2.50	15.00

Lucretia Dewberry—Largest and best of all Dew-

berries. The Lucretia Dewberry is becoming more popular every year. It stands drouth remarkably well. Cover plants during winter and be sure of a crop. We give strong roots.....

.30	2.50	15.00
-----	------	-------

We drop the Loganberry and Strawberry Raspberry from our list. It is a waste of money and labor to try to grow them here.

IMPROVED DWARF JUNE BERRIES.

The Juneberry is perfectly hardy, always bears, never needs to be replanted; fruit size of wild gooseberry, blue-black when fully ripe, a mild, rich, sub-acid, and is considered delicious by most people. It will do well in all parts of the state, and all should have it. It is a good ornamental bush.

	Each	10	100
18 to 24 inches, bearing size	\$0.10	\$0.80	\$ 6.00
10 to 18 inches10	.60	4.00

Can send small size by mail at 10 cents extra per 10.

STRAWBERRIES.

We have been growing strawberries since 1882. We usually have 12 acres of plants, most of which is new planting, from which we dig the plants we sell. We have at present about sixty varieties. We try many new sorts and sometimes find many of them of very superior merit, such as Sample, Clyde, Brandywine, Dunlap and Uncle Jim, which are valuable additions to our list of strawberry plants. The blossoms are either perfect or imperfect. The imperfect are called pistillate, because destitute of stamens containing pollen, and have only pistils to receive the pollen from a staminate sort. The pistillate sorts will be marked (P) in our list, and such sorts need a staminate variety marked (S) near them or in a parallel row. Remember the staminate or fertile sorts will bear alone, but the pistillate sorts will not. We usually

plant one row of staminate to two of pistillate. Our plants are dug as they are ordered.

We only offer the plants this year that we irrigated four times. They are thrifty and well rooted. We find that plants that were not irrigated are of little value this year, and will not offer them to our customers.

Packing and Shipping—We use great care in packing, so that plants will reach destination in first-class condition and that plants shall be true to name and carefully labeled. If shipments are made late in the season and weather warm they should be expressed. Early in the season they may be shipped by freight. When plants are bought near home the express charges will be at least one dollar per thousand less than charges on shipments from the East, and risk of plants heating in transit is not half so great. By buying from us you get plants that do best in the West. Many of the Michigan and other Eastern sorts are worthless here, though recommended there. The grower who depends on Eastern recommendations will be disappointed in many varieties.

Postage—We can send plants by mail postpaid that are bought at the twenty-five rate, but if a hundred is to be sent add 20 cents for postage.

When the plants are received dip the roots only in water or thin mud and lay them loosely in a cool cellar or heel them in in a shady place, spreading each bunch to occupy two feet of the drill, packing dirt firmly about the roots, but leaving tops uncovered. Water them often until ready to plant. If so treated they will be in better condition to replant than if planted on arrival if the weather is dry.

We charge double price for plants in August and September.

Our plants are dug fresh as ordered and not handled by two or more firms before you get them. We dig the whole row, thus getting the strong plants near the center of the row.

Plant in rows as wide apart as corn rows and have the plants about 15 inches apart in the row, requiring about 10,000 plants for an acre or 62 plants per square rod. In planting have the crowns even with the pressed surface of the ground and press the soil firmly about the roots, which should not be bunched together in planting. Cultivate them every week. Tolerate no weeds. Pinch off all fruit stems first year. Do not allow rows to spread more than 18 to 24 inches wide, and cut all runners that reach beyond that limit. It is a great mistake to let them grow too thickly like grass.

Spray your plants with Bordeaux to prevent rust.

To save your berries from late frosts turn the mulching over on the plants and blossoms till danger is past. After first crop of fruit is picked trim your rows down with plow or spade to ten inches and let runners start new plants on the edge of the plowed space. Cover with mulching from November 15 to December 1, and rake off into space between rows when plants begin to grow in the spring. If for any cause you do not get a good stand of plants write us as early as you know it,

and we will help you out with more plants free of charge if we are to blame for poor condition of them, or will not charge more than half price. Can ship plants till the 20th of May. Lime dust made by slacking fresh lime with strong lye water and sifted on strawberry or vegetable plants when dew is on is an excellent remedy for insects and beneficial to the plant. A little flour added to the lime will make it stick a long time. Can add paris green if needed.

PRICES OF LEADING STANDARD SORTS.

In giving the order for 1,000 or more not less than 100 of a sort should be selected.	25	100	1,000
Aroma. (S) —One of the best late sorts, splendid berry, strong, healthy grower	\$0.25	\$0.60	\$4.00
August Luther. (S) —Extra early, fair size, good quality, strong grower25	.60	4.00
Bederwood. (S) —Best early, rapid grower, very productive, good quality, one of the best sorts to pollinize early pistillate sorts, such as Warfield and Crescent....	.25	.60	4.00
Brandywine. (S) —Berry large and handsome, good quality, productive, fine plant and grower, very thrifty, good pollinizer, few sorts so highly recommended.....	.25	.60	4.00
Barrymore. (S) —Medium season, large, color rich dark crimson, awarded a silver medal and 3 first premiums at 1908 Mass. Horticultural Show. Plants cost \$3 per dozen50	1.00
Blaine. (S) —Late and superior to Gandy, strong plants, productive, best shipper among 100 varieties.....	.50 25	.75 100	5.00 1,000
Crescent. (P) —A leading sort, "lazy man's berry," vigorous grower everywhere; early, fruit very sour.....	\$0.25	\$0.60	\$4.00
Commonwealth. (S) —New sort; good grower; very large, productive; very late; very good sort.....	.30	.60	4.00
Dunlap. (S) —At the experiment station in Illinois it was pronounced the best for three years among eighty-two other varieties. We have great confidence in this sort. It has a fine berry, is prolific, stands drouth, heat and cold, and transplants easily. There is danger of it matting together too thickly in the row. The leading sort now25	.60	4.00
Fendall. (P) —New, early to late, very large, productive, yielded 16,800 quarts per acre in Maryland.....	.40	.75	5.00
Glen Mary. (S) —Strong plant of great productiveness, very large berries, widely recommended, a reliable sort..	.30	.60	4.00
Good Luck. (S) —New, a prize winner over 100 competitors. Large, handsome, blood red color. Very productive.....	.30	.60	5.00
Highland. (P) —The Ohio agricultural experiment station says in its report for four years: "The Highland was the most prolific of the 146 varieties composing the station test plats. Fruit medium to large, plants very large, strong and vigorous."			
In 1907, "During the 4 years Highland has been upon the station grounds it has not failed to give very prolific crops. A quart maker of bright, handsome berries of very acceptable quality."40	.75	5.00

Fall Bearing Strawberry Plants.

TWO PLANTS BEARING IN OCTOBER.

Last spring we bought some fall bearing strawberry plants at \$2.50 per dozen. Though hindered by drouth they have grown more thrifty than many of the common sorts beside them, and commenced bearing berries in July, and continued to bear nice berries until November, when frost found them full of green berries.

With these sorts the strawberry season may be extended over three months. Eastern growers claim they can grow 3,000 to 5,000 quarts of fall berries per acre, worth \$1,000.

They claim that the fall bearing sorts will revolutionize strawberry culture. We want all our customers to try them, and offer for spring shipment three of the best sorts:

	Doz.	25	100
Americas. (S)	\$1.50	\$2.50	\$8.00
Francis. (S)	1.50	2.50	8.00
Productive. (P)	1.50
Caution—Several agents took orders around here for fall bearing plants, but none of their plants have proved to be fall bearers. You cannot depend on agents giving you the genuine fall bearing sorts.			
	25	100	1,000
Norwood.—New, Medium season, strong, healthy plant, quality unsurpassed, size unequalled, some berries 3 inches in diameter, 4 filling a box and crowded. Plants sold last year at \$2.00 dozen	\$0.50	\$1.00	\$7.50
Orem. (S)—New, later than Gandy, sure cropper of large, handsome berries, vigorous grower, good shipper.....	.40	.60	5.00
Splendid. (S)—Much like Brandywine in plant and fruit; very productive of large berries. Plant this freely.....	.30	.60	4.00
Stayman. (P)—Very late; blooms late, a splendid, reliable old sort, large berries and productive50	.60	4.00
Tenn. Prolific. (S)—One of the best old sorts, early and always bears good crops of fair sized berries. Superior to the Crescent30	.60	4.00
Uncle Jim. (S)—New, late sort, No. 1 shipper, large size, fine color. The originator says it will bear twice as much to the acre as many other sorts; it did remarkably well the past season30	.60	4.00
Warfield No. 2. (P)—Early and late; very productive, good shipper, good quality, our leading sort, more extensively planted than any other sort. We have not found any sort that will surpass the Warfield in productiveness or quality of fruit. It will not stand drouth as well as some other sorts30	.60	4.00

SELECT EVERGREENS.

Evergreens should be planted in the spring when sap is starting new growth. We handle transplanted trees, which are much safer to transplant than seedlings. Western grown evergreens succeed much better than Eastern trees, as our atmosphere has much less moisture than that of the East. Roots should not get dry for a moment on account of the resinous nature of the sap. Dip the roots in mud thick enough to adhere, and settle good soil about the roots with water. Leave surface about the tree basin shape to hold water and mulching. Water thoroughly, but not too often, till November. The Black Hills Spruce and Ponderosa Pine and the Colorado Evergreens are all succeeding well. The Jack Pine is doing remarkably well on the government reservations in this state. It transplants with very little loss. We recommend it for windbreaks instead of cedars. Scotch and Austrian Pines are excellent for windbreaks and stand drouth. White Pine transplants nicely, and is handsomest of the pines, but will not stand extreme drouth.

NORTH BEND NURSERIES, NORTH BEND, NEB.

Jack Pine is our leading sort for the West, all transplanted. The Jack Pine is the most rapid grower of all pines. Our stock of Jack Pines is large, and we offer them very cheap.

We can procure from green house growers Bourbon, Noisette and Tea Roses for any who wish to grow such indoors or out. See our Descriptive Catalogue for description of many ornamental Shrubs, Roses, Bulbs, etc., not listed here.

We will furnish any of the books in this list at prices annexed, postpaid.

Amateur Fruit Growing, 134 pages, cloth, 50c, paper 25c.

Vegetable Gardening, 252 pages, cloth \$1.00, paper 50c.

Farm Wind breaks and Shelter Belts, 69 pages, paper 25c.

The Gold Mine in Front Yard, a book about flowers, 280 pages, cloth \$1.00.

Evergreens and How to Grow them, 100 pages, cloth 50c, paper 25c.

The Country Kitchen, a practical cook book, 154 pages, cloth 50c, paper 25c.

Poultry Manual, poultry culture in all its branches, 148 pages, cloth 50c, paper 25c.

Can furnish any other agricultural book you may want.

Write the Agricultural Department, Washington, D. C., Division of Publication, for list of Farmers' Bulletins. They are free for the asking.

Tree Protectors, wood veneer, 75c per 100.

What Some of Our Customers Say

North Bend Nurseries, North Bend, Neb.

Gentlemen: Received stock all in fine shape, except one plum tree was missing.

Yours truly,

A. O. EICHHORN.

Shelby, Neb., April 8th, 1911.

Mr. J. W. Stevenson, North Bend, Neb.

Stanton, Neb., April 13th, 1911.

Dear Sir: My order of fruit and forest trees I received and got them planted. I like them very much, and thank you for sending them so early. If any of them fail to grow, which I doubt, I will not blame you, nor ask you to replace them.

Yours truly,

HENRY PELLITIER.

The North Bend Nurseries, J. W. Stevenson, Proprietor, North Bend, Neb.

Archer, Neb., February 21, 1911.

The nursery stock I purchased from you is at this writing all in good condition. The apples and cherries and shade trees made a very good growth, and I am well pleased with the stock. Will tell all my neighbors and friends if they want any nursery stock to buy from the North Bend Nurseries if they want a square deal and save money.

Yours very truly,

GEO. ECKHOFF.

Mr. J. W. Stevenson, North Bend, Neb.

Stanton, Neb., May 5, 1911.

Please find enclosed an order for \$8.85, amount due you for trees sent a couple of weeks ago. The trees were nice for the money. Thanks for same. Wishing you success I remain,

Yours respectfully,

ALFRED MOORE.

Mr. J. W. Stevenson, North Bend, Neb.

Cotesfield, Neb., April 30th, 1911.

Dear Sir: I have some cherry trees I planted last year, and they are in bloom this year. I am well satisfied with your stock. Yours very truly,

OTTO WILDE.

Mr. J. W. Stevenson, North Bend, Neb.

Paxton, Neb., November 16th, 1911.

Dear Sir: In regard to those trees I got of you last spring they made a fine growth. The cottonwoods are four to six feet high, and some are an inch in diameter. The walnuts only grew a few inches. The loss is small, not over 10 per cent. The drouth did not hurt them.

Yours truly,

JOE EGGERT.

Mr. J. W. Stevenson, North Bend, Neb.

Beaver Crossing, Neb., April 17, 1911.

Dear Sir: The plants arrived all right. Yours truly,

E. ATWATER.

North Bend Nurseries, North Bend, Neb.

Pilger, Neb., July 11th, 1911.

Dear Sirs: Enclosed find check to balance account. Stock was very fine. I saved all apple trees thus far but two, and six vines. Yours truly,

CHAS D. CONEY.

Mr. J. W. Stevenson.

Osmond, Neb., May 22nd, 1911.

Dear Sir: Strawberry plants received. Enclosed find stamps for postage. Thank you ever so much. We have been beat by so many fruit agents that we appreciate an honest nurseryman.

Yours truly,

MRS. A. L. KISSINGER.

Mr. J. W. Stevenson.

Columbus, Neb., April 1st, 1911.

Dear Sir: Enclosed find check in full for 180 hackberry trees. The Cemetery Association are well pleased with the trees. They are nice, healthy, straight trees, and we are taking great pains in planting them. Yours truly,

J. A. ERNST, Treasurer.

PRACTICAL FARM BOOKS

We present herewith a partial list of the best books treating on every phase of agricultural and rural life. They have been prepared by the most eminent authorities on their respective specialties, and are thoroughly practical, while at the same time scientifically accurate. To the progressive farmer who desires to keep posted upon the latest investigations of his chosen business these books are invaluable, and there is no investment that will pay such big returns as a few books that will give you the information you need just when you want it. The prices are exceptionally low when you consider their high character and the excellent manner in which they are printed, bound and illustrated.

Price only \$5.00. Agents Wanted. Send for circular to

J. W. STEVENSON,
North Bend, Nebraska

We have been manufacturing and shipping Tree Balers to all parts of the United States and Canada, and some of our customers recommend them as valuable for binding stock fodder as well as for trees.

As the Balers were heavy and expensive we made a lighter and more convenient implement that will bind fodder more conveniently than our Tree Balers at a trifling cost. We have used the binder for three years and think we have it as near perfect as possible. It weighs only thirty-three pounds, and yet we find it is strong enough for any sized bundle of 1 to 2 large armfuls of fodder. Its use would save much time, twine, fodder and hard labor.
